

SubArc Flux Recovery

Submerged Arc
Welding 

Quick Specs

Heavy Industrial Applications

Pressure vessel
Pipe fabrication/construction
Fabrication
Manufacturing

Processes

Submerged arc (SAW)

Input Power

Compressed Air

Features:

Compressed air flux recovery for automatic hopper.

Simple and reliable

Air powered, clean dry air at 3.5bar

Flux level indication through side window

Cyclone flux recovery

Low wear on flux particles

Flush fit

Mounts directly onto the Miller Automatic hopper.

Mounting instructions included

Construction

All steel welded structure. Powder Paint

Special fabric filter bag material

Efficiency solid particles 90 μm 96.6%, 100 μm 99.8%

Weight: 5 kg
